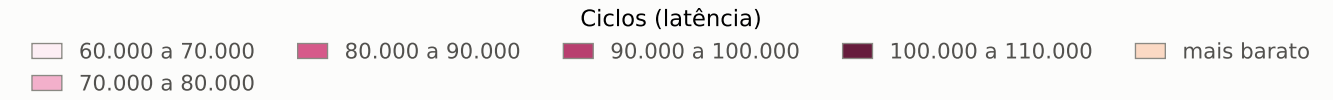
Ciclos (latência) da inversa de G_c (16 x 16), por formato e modo
Estimativa da C synthesis do Vitis HLS, XCU50-FSVH2104-2-E, 100 MHz, sem diretivas
Não depende do par (N, portadora), da configuração nem do número de iterações
Fundo laranja no rótulo: o modo mais barato, comparando do formato com menos bits para o de mais



Ciclos (latência): TDLA30-5, TDLA30-75, TDLA30-300 e TDLC300-100
